You enter a number from 1 to 9 in the squares, but numbers can only be used once.

The rule about multiplication/division ahead of addition/subtraction doesn't apply!

1. $\square + 3 \times \square - 4 \div \square + 6 \times \square - 8 \div \square = 7$

2. $\square + 9 \times 6 - \square \div \square + \square \times 2 - 4 \div \square = 5$

3. $\square + 6 \times \square - 1 \div \square + 7 \times 3 - \square \div \square = 40$

4. $\square + 9 \times \square - \square \div 3 + 5 \times \square - \square \div 8 = 26$
